

AZAD HOSSAIN

Senior Software Engineer

Dhaka, Bangladesh | +880 172 173 1783 | hossainalazad@gmail.com
[linkedin.com/in/hossainalazad](https://www.linkedin.com/in/hossainalazad) | github.com/hossainalazad90

PROFESSIONAL SUMMARY

Accomplished Software Engineer with 8+ years of experience delivering scalable enterprise solutions across Azure and AWS ecosystems. Proven expertise in full-stack development using .NET Core and JavaScript (React, AureliaJS), underpinned by a strong foundation in system design and database architecture. I specialize in leveraging AI-driven workflows to accelerate the development lifecycle—specifically in automating test generation and navigating complex framework migrations—to drive significant gains in productivity and software quality.

TECHNICAL SKILLS

- **Languages:** C#, JavaScript, SQL (MSSQL, PL/pgSQL), HTML5, CSS, XML
- **Backend & Architecture:** .NET Framework, .NET Core, ASP.NET MVC, Clean Architecture, Microservices, Modular/Modular Monolith, N-Tier, etc.
- **Frontend Development:** JQuery, TypeScript, React, AureliaJS, CSS, Razor Pages, etc.
- **Cloud & Serverless:** Microsoft Azure, AWS (Functions, Storage, SignalR, SQL, AD/Entra ID)
- **DevOps & Infrastructure:** Docker, Kubernetes, Helm, CI/CD (GitHub Actions, Azure DevOps Pipelines)
- **Databases & Caching:** Microsoft SQL Server (MSSQL), PostgreSQL, Redis, In-Memory Cache, Distributed SQL Cache, CDN
- **Messaging & API Gateways:** RabbitMQ, Ocelot (API Gateway), Microsoft SignalR (WebSockets)
- **Microsoft Ecosystem:** Bot Framework v4, Custom Adaptive Cards, Active Directory Domain Services (AD DS), Graph API, SharePoint Online (CSOM, PnP Core)
- **Observability & Testing:** Prometheus, Grafana, Seq, Serilog, NLog, Dozzle, xUnit, Integration Test, Swagger/OpenAPI, ngrok
- **Data Engineering:** ETL Pipelines, SQL Server Integration Services (SSIS)

PROFESSIONAL EXPERIENCE

Vivasoft Ltd. | Full Stack Developer

June 2022 – Present | Dhaka, Bangladesh

Client: LiveArena Technologies (AI Producer Platform & Graphics Backend)

- **Architected & Scaled Backend Services:** Designed scalable, N-Tier RESTful APIs using ASP.NET Core for a cloud-native live video production platform. Containerized microservices using Docker and deployed to Kubernetes clusters via Helm.
- **Real-Time Synchronization:** Engineered bi-directional real-time communication using Azure SignalR Service via WebSockets to coordinate live broadcasts, synchronize UI states, and manage interactive public Q&A sessions.
- **Performance & Architecture Optimization:** Architected a highly performant data retrieval system using dual-caching strategies (Redis and SQL-based caching), significantly minimizing database latency.
- **Frontend SPA Development:** Built a standalone, public-facing Q&A single-page application (SPA) using TypeScript and AureliaJS, utilizing rigorous unidirectional data flow and the Event Aggregator pattern for dynamic state recovery.
- **Cloud Infrastructure & Security:** Secured environments using Azure Active Directory and TOTP validation, while interfacing with Azure ecosystem services (Blob Storage, Queues, Azure SQL) for asset management.

Client: Dunite (Enterprise Integrations, Bots, & Automation)

- **Enterprise API Integration Gateway:** Developed a Clean Architecture .NET 8 API gateway utilizing the CQRS pattern (Mediatr) for the Platina Document Management System, managing complex business logic for case procurements.
- **Automated Site Provisioning Pipelines:** Built a C# console application to automate SharePoint Online site cloning utilizing Microsoft PnP, SharePoint CSOM, and Microsoft Graph API with zero

manual tenant configuration.

- **Microsoft Teams Bot Engineering:** Built interactive case management bots using Microsoft Bot Framework v4 and Adaptive Cards for automated case creation and secure document retrieval within a corporate W3D3 environment.
- **Serverless Processing:** Developed highly available Azure Background Functions and queue-triggered workers for asynchronous background processing, PDF form generation, and reliable document ingestion.

Product: PiHR (Comprehensive HR Solution)

- **Microservices Architecture:** Designed a highly scalable backend following Clean Architecture and CQRS patterns for a comprehensive HR system (Attendance, Payroll, Leave modules) targeting AWS and on-premises environments.
- **API Gateway & Distributed Messaging:** Implemented Ocelot for secure API routing and RabbitMQ for handling distributed, domain-specific audit logging and financial system events.
- **Data Persistence & Telemetry:** Managed complex entity workflows utilizing PostgreSQL and MSSQL with Entity Framework Core, alongside rigorous telemetry tracking utilizing Seq and Serilog.

DataSoft Systems Bangladesh Limited | Software Engineer

Aug 2017 – May 2022 | Dhaka, Bangladesh

Projects: Velocity (Anti-Money Laundering Platform) & Enterprise ERP

- **API Architecture:** Designed and developed robust SOAP and RESTful API services using C# to interface with internal and external enterprise systems securely.
- **ETL & Data Migration:** Architected and executed complex ETL (Extract, Transform, Load) pipelines utilizing SQL Server Integration Services (SSIS) to migrate massive legacy datasets into modernized SQL databases accurately.
- **Performance Optimization:** Significantly improved application load times and overall system capabilities through rigorous code modularization, advanced SQL query optimization, and the elimination of technical debt/code redundancy.
- **Reporting Modules & Identity Management:** Engineered custom, automated reporting systems enabling dynamic PDF and Excel generation. Developed and integrated Active Directory Domain Services (AD DS) for centralized enterprise identity management.

PERSONAL TECHNICAL PROJECTS

EventMS | Full-Stack Developer

Tech Stack: ASP.NET Core 8, C#, Next.js 14, TypeScript, PostgreSQL, Pulumi, Docker, CI/CD

- **Full-Stack B2B/B2C Platform:** Architected a comprehensive platform for event planning utilizing an ASP.NET Core backend (Clean Architecture) and a Next.js frontend.
- **Modern Frontend Implementation:** Built responsive, high-performance UIs using Tailwind CSS, TypeScript
- **DevOps & Observability:** Automated CI/CD pipelines (GitHub Actions), integrating system monitoring via Prometheus, Grafana, and Serilog.

Tour & Travel Management System | Full-Stack Developer

Tech Stack: ASP.NET Core MVC, C#, SQL Server, JavaScript, TypeScript, HTML5, SCSS

- **Comprehensive Booking Platform:** Developed a full-stack web application using ASP.NET Core MVC to manage end-to-end travel, tour itineraries, food delivery, and hotel/restaurant bookings.
- **Database & Business Logic:** Integrated robust data architecture utilizing SQL Server, designing relational schemas to handle complex, domain-specific business logic for logistics and user management.

CERTIFICATIONS & PROFESSIONAL TRAINING

Microsoft Certified Solutions Developer (MCSD) | Microsoft (ID: 12293961)

- Developing ASP.NET MVC Web Applications (Exam 486) (2020)
- Developing Microsoft Azure and Web Services (Exam 487) (2015)
- Programming in HTML5 with JavaScript and CSS3 (Exam 480) (2015)
- **Diploma in Enterprise Systems Analysis & Design with C# (1040 Hrs.)** | IsDB-BISEW (2014 – 2015)
- **ASP.NET Core Training** | Bangladesh High-Tech Park Authority (2019)
- **Web Application Development (.NET)** | BASIS Institute of Technology & Management (2015)

EDUCATION

Diploma in Computer Science and Application | *Institute of Science and Information Technology*

2017 – 2019 | CGPA: 3.37 / 4.00

Bachelor of Arts in History | *Jagannath University*

2008 – 2014 | CGPA: 3.17 / 4.00

ADDITIONAL INFORMATION

- **Languages:** Bengali (Native), English (Professional Working Proficiency), Japanese (N5)
- **Volunteer Experience:** Junior IT Consultant at Research Floor (<https://researchfloor.com>) - Advised on core IT strategy, technical implementations, and system oversight.
